

Don't get stuck in the mud or buried in the sand: Pin it and win it with a pair of Maxxcross SM tires.

The SM is an exclusive sand and mud tire that combines a mud-repelling, silica-based rubber compound with a computer-enhanced tread design. In addition to its specially formulated compound, the SM tire also incorporates anti-flex knob bridges on the shoulder, increasing traction and stability. The Maxxcross SM is frequently used by Maxxis' top pros when race conditions are sandy or sloppy.
